

FEM CONGRESS 2022

21-23 September | ITALY Franciacorta

European materials
handling federation

FEM CONGRESS 2022
organized and hosted by

Italian association of lifting,
elevation, handling system
and machinery manufacturers

AISEM is proud to organize the FEM 2022 Congress, the most important international event of the European Federation and Industry held every two years.

It is an extraordinary opportunity for producers in 14 European and international countries to discuss current realities and commercial dynamics, such as European and worldwide market trends, current and future technical regulations, compliance issues, European and international standards and much more.

Equally important is the opportunity of cultural and commercial dialogue in an international and informal context, as well as a great chance to create and/or strengthen international relations between the Participants.

FEM Congress 2022 will take place in the pleasant area of Franciacorta from 21 to 23 September at the Hotel Touring in Coccaglio, Brescia during which there will be a gala dinner at the renowned local winery Contadi Castaldi.

About 90 delegates are expected to the working session and the general conference, while 100 delegates will attend the gala dinner.

FEM Congress 2022 is a real unique opportunity for Companies-sponsors to meet European and international producers of high level and prestige.

That's why AISEM, in partnership with FEM, is pleased to offer a selection of "Sponsorship packages" as follow
